Türk Telekomünikasyon A.Ş.

Güney 2 Bölge Müdürlüğü

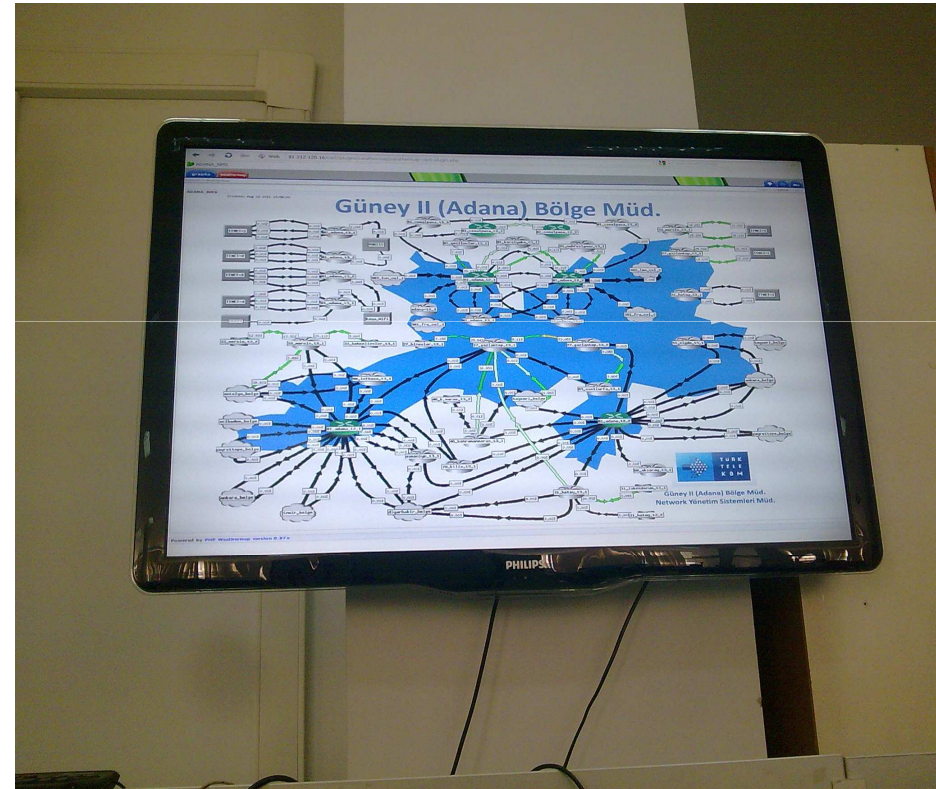

Network Yönetim Sistemleri

- General information about the company
- What I learned from my internship
- Benefits that i got from my internship
- My opinion about the company and the telecommunication sector

General information about the company

- I did my second internship on Türk Telekomünikasyon A.Ş. Güney 2 Bölge Müdürlüğü and my department was Network Management Systems. At this department mainly engineers and technicians works on controlling the network system and repairing the faults online as fast as they can.

What I learned from my internship

- We learned general information about the Türk Telekom's production structure and products on first a few days.
- We took a tour by technicians to the Cemalpaşa Central to inspect and observe the main components such as servers, cooling systems and Dslam's.

What I learned from my internship

- We took a general information about the how central department works and how they identify the suspicious ip's on second week.
- We also learned the basics of the transmission department and observed how they fix the faults by making new routes to relax the network.

What I learned from my internship

- On third week we learned the basic purposes of IPMPLS system and why the companies use that system.
- On the last week;we got information about how the ADSL department works and how they intervene the faults online.
- We also learned how to guide the fault removal teams to the places of the faults which engineers can't intervene online.

My opinion about the company and the telecommunication sector

- Generally I got the information about Türk Telekom which is the biggest telecommunication company in Turkey.
- I got the chance to see the engineers' work place and work style. So; I can say that I got some valuable experiences about working life and business.
- Nevertheless, the knowledge I got in my internship can give a direction to my career in future and can help with my lessons and business life.
- My internship become a good tool to guide me to which department I will choose in my future career. I got more interest in telecommunication and network systems by the help of my internship.

Thank You For Listening
